BEHAVIOUR PROBLEMS

Please give a brief outline of the behaviour problem(s) for which you are referring:

RECOMMENDATIONS PRIOR TO THE CONSULTATION

Please advise your client to have a full health check performed by their regular vet in order to rule out any medical or pain-related conditions that may be contributing to the behaviour problem.

It is recommended that a blood test (CBC, biochemistry and T4) be performed to help rule out medical problems contributing to the pet's behaviour, including urinalysis and faecal analysis in the case of elimination problems. The client's referring veterinary surgeon can refer to the vet referral form should they wish to arrange a referral separately.

ANY OTHER INFORMATION

Please include any other information that is relevant:

NEXT STEP

Please ask the owner to contact us for more details regarding the consultation process and what is involved, including costs.

Thank you for your referral. Nichola Frampton will send you a copy of the report after seeing your client.
